

Of Saturn in Aquary.

Aquary is a Sign hot and moist, of the nature of the Air, light and fixed, vain, North-west, and is more hot and moist than II or ♋ , and is more fixed than *Scorpio* or *Leo*, and not so much fixed as ♄ ; he is Masculine, fortunate, diurnal, Hyernal, sweet in taste, a violent, humane, and strong double-bodied Sign, sound and reasonable, of few Sons, long of Body, and weak Spirited, and crooked withall, addicted to Women; he is the Day-house of *Saturn*, the Detriment of the ☉ , and causeth Diseases and distempers of the Shanks, Legs and Throat, of hot and moist causes, of Blood hot and moist, thick and abounding, as Impostumations, Kings Evil, Squinancy, Infammations, Pimples, with fluxes of Blood.

Saturn in the first 12 degrees of ♋ is hat and moist in the third degree, in gendring and multiplying Blood, as aforesaid, mixed with Melancholy and superfluous Flegm, breeding Fevers of two fits, with heat inward, and cold outward, small Pocks, Meazles and Cankers.

Saturn in the last 18 degrees of ♋ is hot in the beginning of the fourth degree, causing Diseases of Blood abounding mixed with Melancholy and Flegm, producing the *French Pox*, Impostumes, Cankers and Itches, and divers such Diseases.

Saturn in Cancer.

Cancer is the heart of the North, and is a Sign cold and moist, of the nature of the Water, corruptive and expulsive, Nocturnal and Feminine, direct, vicious, heavy and salt in taste, of the Summer, hurtful, sound, and of many Sons, and doth give divers and unequal proportions of the Body, signifying creeping Vermin, and Beasts of the Water, and noble, gentle, yet unstable Women, without voice, and is the Day and Night-house of the ♃ , the Exaltation of ♃ , and the Fall of ♄ , the Detriment of *Saturn*, and hath of the Body humane the Stomach, Breast, the Lungs and the Appurtenances: and of Diseases he causeth Biles, Leprosies, Dropsies, Fistulaes, Red spots, Itches, Scurfs, Deafness, Baldness, and small Beard, the *French Pox* and Impostumations of cold: of

Humours it signifieth waterish and thin saltish Flegm and corruptive.

Saturn in ♄ in the first 18 degrees is cold in the first degree, and temperate in drowth and moisture, ingendring Diseases of much Flegm and Water mixed with thin Melancholy, causing Coughs, stopping of the Stomach, oppilations, with pains and prickings, of cold causes, in the Stomach, with shivering; and it produceth also the black Plague, by reason that the Blood is overcome with Flegm and Water, and it will be long e're the Sores will come out, and they come forth with much pain; but this Plague is not infections. This Plague, by the testimony of Dr. *Foreman*, reigned in *London* in the years 1592, and 1593, (who had it himself, and saw the depth of this Diseases) some were taken in the Heads and they did sleep much, for the brain was then much infected; and they did oft escape, being well back'd to, and purged with *Confection of Hamech*: some were infected both in the Brain, and at the Heart and Liver, and these would vomit much, and sleep much, and were very drowth, and these did most commonly dye the fourth day, and were without Remedy: some were infected in the Liver, and their Sores came forth in the Groyns, and these did neither sleep nor vomit, and did always escape, being well looked unto, being purged well with *Confection of Hamech* and *Diacarthamus*.

Of the Black Plague caused of Saturn in Cancer.

You must understand that the cause of this Plague is, as aforesaid, of Flegm, thin Water, and Melancholy mixt, Flegm and Water having the dominion; and they that are taken with this Plague have much heaviness, weakness, and faintness, with a cold shivering three or four dayes, and sometimes seven or eight dayes before they be sick, and they cannot eat their meat, but are cold inward; and if the Humours apply to the Brain, then they are heavy and drowsie with sleep, and the Sores do come forth and appear commonly about the ears or neck, or in the face; and if the Humours settle to the Heart, then the Parties are fearful, timorous and faint, and the botch cometh forth under the Arm-pits, Breast and Shoulders, or Back; if the humour rest in the

Liver, and something affect the Heart withall, then they vomit, and the Sores will come forth in the Groyn, Buttocks, or thighs, and in this case it is good to vomit much, and to purge; and if the Brain and Liver be both infected, then the Party vomiteth much, and is very sleepy, and most commonly they dye within three or four dayes after they be taken with it, and there is seldome remedy, or none at all.

And you shall understand that this Plague was not infectious, because it came of a cold cause; and there was nothing that bred it so soon as eating of fresh Herrings and Cucumbers, and fruit, and such things as breed slimy Flegm and Water; and most commonly where it took a house, it went round amongst children and servants, that were all of one kind of feeding; and those two years was great plenty of fresh Herrings, and much fruit; and there dyed in the year 1593 eighteen hundred a week, and most of the Doctors of Physick did fly from *London*, and Dr. *Foreman* staid by it, and thanks God he saved many.

He farther saith from his own experience, that as there are two sorts of Plague, *viz.* from *Saturn* and *Mars*, so there are two sorts of Gods Tokens, the one black, and the other red; if the red spots do appear on them that have the black Plague, they may escape and live; and if the black spots do appear on them that have the red Plague, then they usually escape; but if the red spots appear in the red Plague, and the black spots in the black Plague, there is no other to be expected but death. He also saith, he saw this in himself and many others. And moreover he observes, that the farther *Saturn* went into *Cancer*, the more the Plague did increase, and when he was in the latter end of ♄ the Plague ragged vehemently, and was at the highest.

Saturn in the last 12 degrees of *Cancer*, is moist in the beginning of the first degree, and cold in the beginning of the second degree, ingendring Diseases, and the black Plague, of thin Water and Melancholy, with heaviness and faintness, three or four dayes before they feel the Plague, and have no lust to their meat, and yet they are in reasonable temperature, and if this Humour settle and affect the Brain, the Party will be very heavy with sleep; if into the Stomach, then apt to cast.

Saturn in Scorpio.

Saturn in the first six degrees of *Scorpio* is moist in the first degree, and cold in the second, ingendring Diseases of much Flegm and Melancholy, but Flegm is predominant, as the French Pox, Swine Pox, Fistulaes, Gouts, Impostumes and cold Agues, and in this cold and moisture beareth sway; and it is tough, stinking, and slimy Flegm, causing cold, and the Parties shall be cold both inward and outward, with trembling and shaking; and *Saturn* in ♀ causeth also the black Plague, as he doth in ☿, but more strong and more forcible, of slimy Flegm and stinking Water; and the spittle is sharp and sour, especially if the Humour be gathered in the Stomach, but if it be gathered in the Liver, then there is heaviness in the Hypocendries, in the right side; and if the Humour be gathered in the inwards, it will grieve him to fetch his breath, but if it be in the Milt, there will be grief and heaviness in the left side; if it be in the Matrix, then there will be grief in the Reins and place of the Matrix; and if it be in the Lights and spiritual Members, then there followeth a Cough, and a hard fetching of breath, and dulness in the Stomach and Liver; it causeth evil digestion, and little appetite to eat, and most commonly this runneth out into the extreme parts, and causeth much pain of the joynts and *arthritica passio*, and the French Pox, and sometimes the Party hath a Fever withall, and then the Urine is duekish white, of an Iron colour, grayish, near unto white, with a mean substance; and this signifieth *Acetosum: id est*, Flegm tart, sour and cold.

Saturn in the next 18 degrees of *Scorpio* is moist in the second degree, and cold in the third, causing Diseases of filthy Flegm mixed with Melancholy, causing the French Pox, Fistulaes, cold and moist Gouts, Impostumations, and cold Fevers, or *Artbritica passio*, and Fevers of *Phlegma Acetosum*, as is said in the first six degrees of *Scorpio*.

Saturn in the last six degrees of ♀ is cold in the beginning of the third degree, causing Diseases of tough, slimy and filthy stinking Flegm, mix'd with Melancholy, causing Fistulaes, cold Goats, Impostumations, cold Fevers, the French Pox, &c. and this Flegm is called *Phlegma Acetosum*, which is tart, sour and cold;

and the Party shall be cold both inward and outward, with trembling and shaking, and causeth also the black Plague, more forcible than in *Cancer*, and of a more slimy and stinking Humour, and in such a case the Urine is white and yellowish, or of an Iron gray, near unto white, with a mean substance, and this signifieth *Acetosum phlegms* to abound without a Fever.

Of Pisces.

Pisces is a Sign cold and moist, of the nature of the Water, flegmatick, and is more cold than *Cancer* or *Scorpio*, and is the moistest of all the Signs, and is of the North-west, Nocturnal, Feminine, common, oblique and crooked, infortunate, lacking voice, signifying Birds, Fowls, and Fishes of the Sea and other waters; is double-bodied, unsavoury, salt of taste, and more salt than ♄ or ♃, unequal of proportion, of mean beauty, hurtful, burst, broken, rent, torn, wayward, and a Sign of many Daughters, and much use and company of Women, and signifieth thick and tough Flegm, the Gout in the Feet, the wet Gout and Dropsie, Biles, Botches, Impostumations, *French Pox*, Meazles, red Spots, Fluxes, Scurfs, Itches, Deafness and Baldness, and a small Beard, he is the Night-house of ♃, the Exaltation of ♀, the Fall and Detriment of ♀.

Saturn in the first 12 degrees of *Pisces*, is moist in the 3d degree, and cold in the 4th, ingendring Diseases cold and moist, of much tough and stinking Flegm mixed with Melancholy, as the *French Pox*, Aches in he Bones, *Artbritica passio*, the cold and moist Gout, *Fistulaes*.

Saturn in the last 18 degrees of *Pisces*, is moist in the beginning, and cold in the extremity of the 4th degree, above Nature, corruptive and digestive, extinguishing the radical Humidity of the Body by much cold, and inferring death and corruption, and mortification of the Members, ingendring Diseases, as Gouts, dead Palsies, Falling-sickness, *Epilepsia*, *French Pox*, Aches in the bones, *Artbertica Passio*, Dropsies, and the black Plague, as in *Scorpio*.

Of Jupiter.

Jupiter is next unto *Saturn*, and he passeth the 12 Signs of the *Zodiack* in 12 years; By nature he is hot and moist, temperate, of the nature of the Air, sanguine, light, sweet in taste, Ascending, nourishing and increasing. He hath in the Body humane the Liver, the Blood and the Stomach, the Vital spirits the left Ear, and the Belly; the inward part of the Brain-pan, the Navel, the Intestines, the Ribs, the right Hand, and Cartilages, with the Grissels, and ruleth the Virtue Digestive and the Natural Virtue, and is friendly to the Life of Man.

Of Diseases, *Jupiter* causeth the increasing and abundance of Blood, Impostumations and Plurisies, the Squinancy, Impostumes of the Lungs, the Cramp, the Apoplexy, the Lethargy, the Cephalick and Cardiack Passion, the Fever *Synochus* and *Synocha inflatima*, and all Impostumations of Blood, and Diseases that come of superabounding of blood.

If the Blood be mixed with Melancholy, the water looketh somewhat dark or blackish, swarthy and heavy.

If Blood and Choler adust be mixed, the colour of the Urine will be like unto Hemp.

If Blood and Choler adust be mixed, and Blood be predominate, then is the Urine *subrubicurida*.

If Blood be mixed with Choler, and Blood predominate, then the Urine is reddish, and the Party is troubled and tormented most with his Disease from nine of the clock at night till three in the morning, and is dry, and drinketh much and sleepeth little.

But if Blood and Choler be mixed, and Choler have the predominancy, *subrufam facit Urinam*.

If Blood and Choler be equally mixed, *tunc rufam facit Urinam*; but the Choler sheweth yellow in the Urine, and the Urine is very red and thin.

If Blood be mixed with Flegm, and Flegm have the upper hand, then the Urine looketh of a dark reddish colour, heavy (as it were) a deep yellow, and the Party eateth little, and is dry inwardly, yet drinketh but ordinarily; but is in most pain from three a clock at afternoon till nine at night.

If the Urine be thick in substance, and red in colour, then Blood hath the predominancy in the Distemper, and is cause of the Disease.

If Urine be thin of substance, and red of colour, then Choler hath the predominancy, and causeth the Disease.

If the Urine be thin of substance, and darkish white in colour, then Melancholy ruleth, and causeth the Disease.

Cold causeth whiteness in colour, and doth thicken, and is passive and ponderous, congealing and destroying, indigestive, stopping, and making oppilations, in the Body, extinguishing the Radical Heat and Breath of Life.

Heat causeth redness and thinness, attenuating, digestive, preparing and opening, active, increasing and ascending, light and quick in, moving, nourishing and preserving the Radical moisture and humidity of the body.

Moistness causeth blackness, darkness and thickness, corruptive, putrifying and rotting, and is decreasing and descending, heavy, slow in motion, dissolving and expelling.

Drowth causeth thinness, blackness or darkness, yellowness and cleerness, as it is mix'd with Choler or Melancholy; if with Choler, the Urine looketh yellowish; if with Melancholy, black and darkish; and Drowth is passive, descending, decreasing light, and quick in moving, drying and drawing, thirsty, sucking, preserving, making to abide and indure, knitting and joyning together.

Cold and drowth cause thinness and whiteness, but if the melancholick Humour be fæculent, or of burnt Choler, then the Urine sheweth somewhat thick and dark, or brown like deep Sack or Bastard; and if the melancholick Humour be ery dry, not burnt, then is the Urine very thin and cleer, like Rhenish-wine or White-wine, and sometime like Water.

Heat and Moisture of Blood make the Urine red and somewhat thick, or between thick and thin, but red.

Heat and Drowth of Choler make the Urine glowing red, and somewhat thin.

Of ♃ in ♊, ♎, and ♏.

Jupiter in *Gemini*, *Libra* and *Aquary*, is of the nature of the Air, sanguine, hot and moist, increasing of the blood, and causing Diseases from blood superabounding, &c. as follows.
