

A sample page from: **Die Deutsche Ephemeride Band VIII, 2001-2020.**

One month per two page spread. Zodiacal positions given daily. Sun to the nearest second. Declination of the Sun given daily. Declination & latitude of Moon daily. Declinations for the other planets given every three days. Note the non-standard planetary order on the right hand side. Lunar node (lower right hand corner) is mean. No lunations, no eclipses, no aspectarian. Just your plain nuts & bolts ephemeris.

In the back: Pluto ephemeris, 1850-1960, for earlier Bands that lacked it; Latitude & longitudes for major world cities; An overview of time changes in Europe since 1582 (includes some of the most detailed notes on the change from Julian to Gregorian calendars that I have seen); Table of logarithms.

2010 JANUAR
