

Dave's "Best of the Best" list of Astrology Books

(Not our complete catalogue, just the best parts of it.)

I've often been asked for a list of my favorite astrology books, the ones I thought best. For years I resisted as I did not want to slight all the other authors of all the other books. Also, I didn't think my personal biases should get any more attention than they already do. But we live in a world that is graded (good - better - best) & those who make the rankings take it upon themselves, for better or worse. All of these books are **in print** and **in stock**. Be forewarned: These are demanding books.

You will find a version of this flyer at <http://www.AstroAmerica.com/TopTen.html>. There, each of these titles are linked to informative blurbs, price & other purchase information. Here are the best of the best:

Postscript: A great work is the result of great talent, combined with an element of luck. Gurdjieff said talent was like salt. It must be handled skillfully. Scattered or misapplied & it is lost or the effect ruined. Few authors have the talent for a great book. Few ever will.

That said, there are many other good books. These books & authors are mere springboards. What do you want to study, where do you want to go? The possibilities are endless.

This list will be updated from time to time.
