

# A sample page from Lahiri's Condensed Ephemeris of the Planets' Positions, 1941 - 1951.

*For each of the eleven years in this ephemeris:*

The main ephemeris runs for three and a half pages. It is preceded by a page of Lunar positions (daily). It is followed by longitudes of Rahu, Uranus, Neptune & Pluto, given monthly. Following that, a table of Combustion, or Heliacal setting of planets, a table of Retrogression of Planets, New & Full Moons, and Sun's entrance into Nirayana signs.

## 1947 A. D. Longitude of Planets CONDENSED

Ayanamsa on 1st Jan. : 23° 06' 50''
